

# Pathology Update

## Practical Approach and Emerging Issues in Breast Pathology

### October 30, 2020

#### Digital Conference

Dear Colleagues,

We are pleased to announce this year's Pathology Update will take place on October 30<sup>th</sup> 2020 via a digital conference platform and we welcome your participation.

This one-day conference is designed to highlight recent advances in surgical pathology with corresponding clinical correlation and prognostic implications. We are thrilled to have Drs. Anita Bane and Benjamin Calhoun join us as our keynote speakers for the 2020 conference which will focus on Breast Pathology.

The full day program includes large group learning activities and case discussions with several program breaks providing the opportunity to virtually visit the corporate supporters.

In 2019 we had a very successful symposium with more than 150 attendees. We look forward to building on the success of this meeting and expect an even greater number of attendees this year. We would like to invite you to be part of this meeting by considering participation in our supporter program (please see column on right). We would also be pleased to discuss any other additional support options with you.

For more information or to confirm your commitment of support, please contact Brien Wong, Lead Planner, CPD, at [brien.wong@utoronto.ca](mailto:brien.wong@utoronto.ca).

Sincerely,

The 2020 Pathology Update Planning Committee
