University of Toronto

David Tang-Wai MDCM FRCPC

Associate Professor
Division of Neurology
Department of Medicine
University of Toronto

Xavier Montalban MD PhD FEAN

Professor of Neurology
Director, Division of Neurology
Department of Medicine
University of Toronto

Dear Colleagues,

The Department of Neurology at the University of Toronto is delighted to invite you to Toronto Neurology Update.

The Toronto Neurology Update, running biennially over the last 20 years, has a long history of providing an outstanding neurological educational and practical clinical experience for attendees. The educational focus is on non-neurologist physicians (such as family physicians, geriatricians, internists, physiatrists, psychiatrists, emergency room physicians and others) and other allied health care providers who seek to continually improve their skills and knowledge in neurology.

The event will be a two-day event featuring a combination of lectures and workshops. The organizing committee has put together an excellent program utilizing the expertise of many of the exceptional and world leaders in the Division of Neurology at the University of Toronto who impact on both research and clinical care. We make an effort to rotate faculty members to allow us to highlight the broad range of educational talent that we have here in the Division of Neurology and some of our collaborating programs. The TNU has consistently received outstanding reviews from attendees.

As you will see from the attached preliminary program, we are addressing a number of important topics in the field of Neurology. In addition to didactic lectures we are providing workshops on neurological examination skills to improve attendee confidence in their ability to assess patients with neurological disease.

We expect over 150 registrants, of whom most will be practicing physicians, but will also anticipate registration of allied health professionals as well as resident and medical student trainees.

In order to make this conference a success, we ask for your continued or new support. Please take a moment to review the support levels and benefits included on the next page.

Sincerely,

Dr Xavier Montalban
Dr Peter Tai
Dr David Tang-Wai
