

The Excellence in Quality Improvement Certificate Program (EQUIP) 2024-25

Overview

The goal of EQUIP is to train current and future clinicians and leaders working at university-affiliated academic health centres or clinics to build capacity in QI. The EQUIP program's enriched content and deeper dive into QI methodologies make projects more likely to succeed, and will prepare participants to maximize their project's impact and receive academic recognition for their work.

Who is EQUIP for?

- Academic faculty seeking to make QI the focus of their clinical or scholarly activities
- Senior trainees wanting to make QI an academic career focus
- Health professionals in advanced practice or leadership positions working in academic health centres

Course application and fees

Registrants must submit an application form consisting of:

- Applicant information
- An abbreviated CV (max. 5 pages)
- A personal statement (max. 500 words)
- A letter of support from a department head, executive team member, professional practice lead, or program director (for trainees) on official letterhead with their contact information, confirming that the applicant works or trains in a university-affiliated academic health centre or clinic where they will carry out a QI project as part of this course.

Please email the complete application to cquips@utoronto.ca.

Application deadline: April 26, 2024 @ 4PM ET

Course fee: \$6,995 CAD

cpd.utoronto.ca/equip

Key dates

- Jul 30-31 & Aug 1, 2024
Three-day virtual session
- Aug 2024 to Mar 2025
Eight monthly webinars
Project coaching
- May 7-9, 2025
Three-day virtual session

"The course content is extremely high yield and practical. You meet national and international colleagues who you can learn from and become future collaborators.

The faculty are world-renowned and the course gives you a network base of QI leaders. I have maintained connections with many of the certificate's faculty which has led to wonderful opportunities. It is the most worthwhile continuing education I have done that has had a measurable and lasting impact on my career."

– Dr. Samara Zavalkoff,
2018 EQUIP graduate
Medical Director of Quality
and Safety, PICU
Montreal Children's Hospital

Key features of EQUIP

1

A deeper dive into QI

- EQUIP's enriched content goes beyond a superficial introduction to QI principles. It takes a deeper dive into QI methodologies and will maximize participants' project impact, making them significantly more likely to succeed.

2

Expert faculty who are clinicians with real-world QI expertise

- The multidisciplinary EQUIP faculty members have a track record of successfully executing QI projects in academic settings. Their project work has produced publications in high-impact journals such as JAMA Internal Medicine, Academic Medicine, and BMJ Quality & Safety.
- Core faculty members have made significant contributions to local, national and international educational programs in QI and patient safety through collaboration with organizations such as the Royal College of Physicians and Surgeons of Canada and the Association of American Medical Colleges.

3

Dedicated project coach provides tailored advice on your QI projects

- Each participant is assigned an EQUIP faculty mentor who has a wealth of experience executing successful QI projects in academic settings. They provide one-on-one coaching and support for projects over the course of the program.
- The impact of interactive small group learning is maximized with a low faculty-to-participant ratio (1:3). This allows for personalized feedback on participants' QI projects.

4

Emphasis on academic skill development

- EQUIP's enriched content and deeper dive into QI methodologies will not only make your projects more likely to succeed, but also foster:
 - Scholarly writing for optimal dissemination of QI innovations;
 - Teaching QI including role-modelling and project supervision;
 - Advanced quantitative and qualitative evaluation methods;
 - Preparing a portfolio for academic promotion on the basis of QI

5

Graduates receive an academic certificate in QI

- Upon successful completion of EQUIP, participants are granted an academic certificate in quality improvement from the University of Toronto.
