Canadian Orthopaedic Foot & Ankle Symposium

Dear Colleague,

The continued success of the University of Toronto's Biennial Foot & Ankle Symposium has been due to a combination of excellent speakers, dedicated participants, and enthusiastic exhibitors. With this in mind, we welcome you to join us at the 14th Biennial Canadian Orthopaedic Foot & Ankle Symposium on Thursday, April 16 Skills Lab Day and Friday, April 17-Saturday, April 18, 2020 Symposium at the Metro Toronto Convention Centre, Toronto Ontario.

The Biennial Foot and Ankle Symposium is Canada's largest surgical Foot & Ankle meeting, and represents the core community of Canadian orthopaedic surgeons.

This year's topics include: Minimally invasive forefoot surgery; Use of minimally invasive surgery for deformity correction in Charcot; Salvaging complications of the Ring Fixator; Deformity correction and TAR; Salvage of failed TAR; Cartilage- transfer/transplant - why aren't we doing better; Lesser toe mtp oa salvage; Perceptions vs reality in forefoot surgery; Small Quality improvement initiatives and where to start.

Open to Platinum level: We will be holding an accredited surgical teaching lab at the Mount Sinai Hospital April 16, 2020 prior to the start of the meeting. We will have a national panel of Canadian experts from coast to coast presenting at our meeting. We expect another great turn out due to our invited North American speakers.

Our surgical lab meeting will focus on minimally invasive (MIS) foot surgery, and ankle replacement. This will be a fully accredited hands on surgical lab with one-on-one teaching by expert faculty. Limited enrollment. Register early!

If there is any further information you require, please don't hesitate to contact us.

Best regards,

Timothy Daniels MD, FRCSC
Co-Chair
Professor of Orthopaedics
St. Michael's Hospital, Toronto

Johnny Lau MD, FRCSC
Co-Chair
Assistant Professor of Orthopaedics
University Health Network, Toronto Western Hospital
