Multidisciplinary Gynecologic Oncology Annual Lecture Series 2022

Dear Sponsors,

The continued success of the Multidisciplinary Gynecologic Oncology Annual Lecture Series 2022 meeting is due to a combination of excellent speakers, dedicated participants, and enthusiastic exhibitors. With this in mind, we welcome you to join us at the Omni King Edward Hotel, Toronto on Friday, October 21, 2022.

This one-day program will provide an update on various topics in the field of Gynecologic Oncology and will focus on:

- Maintenance PARP inhibitors treatment decisions, controversies, and challenges:
 - Featuring international keynote speaker Dr. Mansoor Raza Mirza
- Biomarkers-driven systemic and radiation therapy in endometrial cancer
- Introduction and integration of the newly developed Ovarian-Adnexal Reporting & Data System (ORADs)

We aim to review advances in surgical management, systemic therapy, radiation therapy and survivorship care for women with gynecologic malignancies. The lecture presentations will be done by Canadian experts across gynecologic oncology disease sites and their multidisciplinary colleagues (Gynecologic Oncologists, Medical Oncologists, Radiation Oncologists, General Gynecologists, Pathologists, General Practitioner-Oncology, Oncology Nurses, Oncology Pharmacists and Genetic Counsellors).

We hope you will join us for this unique educational program and encourage you to reach out to us, as exhibitor space is limited and priority is given to those that commit early.

Cheques can be made payable to *University of Toronto*.
