

# Pathology Update

Head and Neck Pathology:  
Practical Approach and Emerging Issues

November 4-5, 2021

Digital Conference

Dear Colleagues,

We are pleased to announce this year's Pathology Update will take place on November 4-5, 2021 via a digital conference platform and we welcome your participation.

This two-day conference is designed to provide practical reviews of recently described entities and contemporary approaches to commonly encountered diagnostically challenging areas of head & neck pathology. The guest speaker for this year will be Dr. Justin Bishop of the University of Texas – Southwestern, a world-renowned expert and a major contributor to the last WHO H&N classification of tumors.

The shortened full-day programs includes large group learning activities and case discussions with several program breaks providing the opportunity to virtually visit the corporate supporters.

We had a very successful digital conference in 2020 with more than 140 attendees and look forward to building on the success of this meeting with even greater number of attendees this year. We would like to invite you to be part of this meeting by considering participation in our supporter program (please see column on right). We would also be pleased to discuss any other additional support options with you.

For more information or to confirm your commitment of support, please contact Brien Wong, Lead Planner, CPD, at [brien.wong@utoronto.ca](mailto:brien.wong@utoronto.ca).

Sincerely,

The 2021 Pathology Update Program Directors

James Conner MD PhD
